A stress-free build, delivered with peace of mind.

Thank you for taking the time to look at our company profile. Sezibera Construction Ltd builds, renovates and fits out for clients in Kigali and beyond, and our aim on every contract is the same: to finish the work to the agreed standard, on the agreed programme.

We have completed sixteen projects to date: apartment buildings, a warehouse facility, a modern garage, a school feeding kitchen, hotel and commercial renovations, office partitioning and fit-out works, and the civil works that support them. Each is listed in this profile with its client and location, and the clients concerned are willing to be contacted.

A named project manager runs each site, our quantity surveyor measures and values the works, and I remain reachable throughout the contract. Where an issue arises on site we raise it with the client early and in writing, with our proposed solution.

This profile sets out what we do, who we have worked for, and the people who will be accountable for your project. We would be glad to discuss your requirements.

Our site team at work — supervision, sequencing and safety are managed on site, every day.

OUR PROMISE

“Your vision, our
commitment —
construction, effortlessly
executed.”

Martin Sezibera
GENERAL MANAGER

About the company.

Sezibera Construction Ltd is a construction and contracting company based in Kigali, Rwanda. We take projects from the first plan to final handover: buildings, roads and pavements, maintenance and renovation, and the other civil engineering works a site needs.

Embrace stress-free construction with Sezibera. Our unwavering reliability ensures a smooth building experience from inception to completion. With a rich legacy and a passion for crafting extraordinary spaces, we invite you to leave your construction worries behind.

With a robust working culture and outstanding output, our tangible impact has enabled us to grow our portfolio exponentially. Completed projects range from residential buildings and commercial spaces to medical facilities, hospitality venues, industrial units and warehouses.

The company was registered with the Rwanda Development Board on 13 September 2016 and has traded continuously since, adding roads and railways, other civil engineering works and demolition to its registered activities in 2023.

What we are for.

MISSION

To provide complete construction and contracting solutions through integrated services — from the first plan to final handover, delivering quality at every stage.

VISION

To be Africa's most trusted construction and contracting partner, where clients get every stage of the build under one reliable umbrella.

OUR VALUES

RELIABILITY

We commit to a programme and a price, and we hold to them. What changes on site is raised in writing before it costs money.

ACCOUNTABILITY

One named project manager owns your site from mobilisation to handover, and answers for it.

WORKMANSHIP

Quality is inspected at each stage — setting out, reinforcement, casting, envelope and finishes — not judged at the end.

TRANSPARENCY

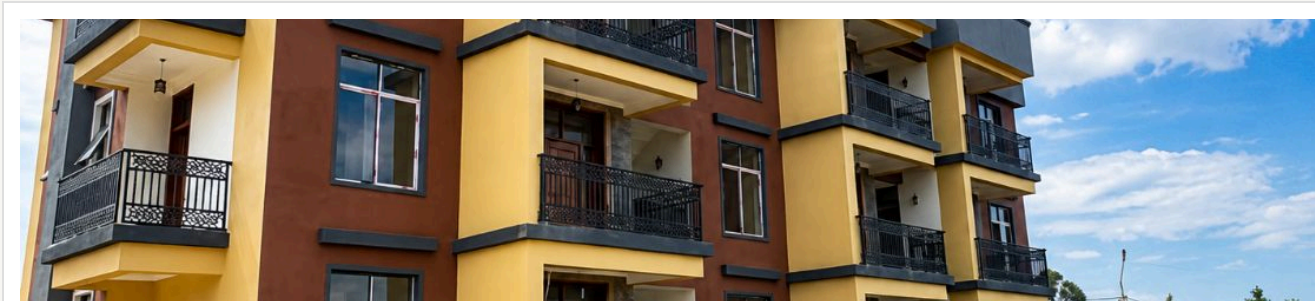

Valuations, variations and programme are reported openly, so the client is never the last to know.

SAFETY

Protective equipment, edge protection and site induction are conditions of working with us, for our people and yours.

PARTNERSHIP

Most of our work is repeat work. We build for the next contract as much as the current one.

What we do.

01 Construction of buildings

Residential, commercial, medical, hospitality and industrial buildings taken from foundation level to a finished structure ready for occupation — substructure, reinforced concrete frame, masonry and envelope, roofing, services coordination, finishes and external works.

02 Construction of roads and pavements

Access roads, internal estate roads, paving, hardstanding, surfacing, kerbing and drainage — built to carry real traffic and real load, with the sub-base and falls that keep them serviceable.

03 Maintenance and renovation of buildings

Refurbishment, upgrades, extensions, structural alterations and phased remedial works — including occupied hotels, offices and homes, sequenced so the building keeps working through the contract.

04 Construction of other civil engineering projects

Clearing, excavation and levelling, reinforced concrete structures, drainage, below-ground services, retaining structures and boundary works — the civil works that make a site buildable and keep it stable.

05 Office partitioning and corporate fit-out

Glazed, aluminium and gypsum partitioning, suspended ceilings, flooring, joinery and workstations, doors and ironmongery, painting and decoration — with power, data, lighting and HVAC coordinated into the layout. Delivered inside occupied commercial buildings to landlord fit-out rules, and reinstated at lease end. Detailed in sections 05 and 06.

Fit-out and partitioning in working offices.

We carry out office partitioning and interior fit-out as a single package, from the approved space plan through to snagging and handover. Most of this work is done in buildings that remain in use, so the works are planned around the occupier’s operations and carried out under the conditions set by the landlord or managing agent.

Partitioning Glazed and framed glass partitions, aluminium systems, gypsum and stud partitions, acoustic and fire-rated linings, doors, ironmongery and manifestation.	Ceilings and flooring Suspended and mineral-fibre ceilings, gypsum bulkheads, access hatches; vinyl, tile, carpet and skirting, with levelling screeds where required.
Joinery and furniture Reception desks, tea points, storage walls, workstation runs and fixed joinery, set out to the approved space plan.	Services coordination Small power and data containment, lighting and switching, HVAC diffuser and grille relocation, fire detection and sprinkler alterations by approved specialists under our coordination.
Finishes and decoration Wall preparation, painting, feature finishes, signage backing and final decoration to sample-approved standards.	Strip-out and reinstatement Soft strip-out, dilapidations works and reinstatement to base-build condition at lease end, recorded against the schedule of condition.

The works are measured and priced by our own quantity surveyor, a named project manager is on site for the duration of the fit-out, and we prepare and submit the landlord’s approval pack on the client’s behalf.

Completed fit-out projects.

Three corporate clients whose offices we have partitioned and fitted out. Dates of completion and client contacts are available on request, and each client is willing to be approached as a reference.

SORAS TOWERS, KIGALI — RENOVATION AND PARTITIONING IN AN OCCUPIED TOWER, NOW HOUSING TECKNOWLEDGE AND AGARWAL’S EYES HOSPITAL

S

Soras Towers

COMMERCIAL OFFICE TOWER, KIGALI

Renovation and internal partitioning works within a fully occupied commercial tower — now home to the offices of Tecknowledge and Agarwal’s Eyes Hospital. Office areas were altered and refinished floor by floor, with common areas, lifts and tenant access kept in service throughout.

OCCUPIED TOWER · PHASED BY FLOOR · BUILDING-MANAGEMENT COORDINATION

Rwanda Events Group

CORPORATE OFFICES, KIGALI

Office fit-out and partitioning: layout set out to the client’s space plan, partitions and doors installed, ceilings and finishes completed, and power, data and lighting coordinated into the new arrangement.

CORPORATE FIT-OUT · CLIENT SPACE PLAN · HANDED OVER COMPLETE

P

Profilco

CORPORATE OFFICES, KIGALI

Office partitioning and interior fit-out for a commercial occupier — partitioning, ceilings, flooring and decoration executed alongside the client’s continuing operations, with works sequenced outside business hours where required.

FIT-OUT IN A WORKING OFFICE · OUT-OF-HOURS SEQUENCING

Further site and completion photographs for each fit-out are held on file and are issued with our tender submission or on request. Alongside these, seven of our sixteen completed contracts were renovation, refurbishment or fit-out works, most of them in buildings that remained in use — see the project register in section 09.

How we control quality and safety on site.

Our quality management system follows six basic principles, applied on every contract regardless of size.

- 01 Provide for long-term quality control through established processes.
- 02 Nurture and guide our quality culture through proven policies.
- 03 Identify and control the quality standard to be achieved.
- 04 Plan for quality — identifying the measures for achieving the quality required.
- 05 Ensure quality by encouraging all parties to work together to deliver.
- 06 Provide a process of continuous improvement, correcting any potential defect.

HEALTH AND SAFETY

Site induction, protective equipment, edge protection, netting and scaffold inspection are standard on our sites. Subcontractors work to the same rules as our own crews, and site supervision is present whenever work is in progress.

ENVIRONMENT AND COMMUNITY

We manage spoil, dust and noise around neighbours, keep drainage running during works, source materials locally where we can, and hand back a clean site. On occupied buildings, access and safety for users comes before programme.

Why clients choose us.

A completed record

Sixteen contracts completed and handed over, from single-floor office fit-outs to a G+3 apartment building. Every one is listed in this profile with its client and location.

Repeat clients

Glads Apartment has awarded us four separate projects, and Rwanda Events Group two. Clients who have worked with us once come back.

One contract, every trade

Buildings, roads, renovation and civil works under one contractor — fewer interfaces to coordinate and one party accountable for the result.

Costed by a quantity surveyor

Bills are measured and valued in house, so pricing is defensible at tender and valuations are reconciled monthly, not argued at the end.

Work in occupied buildings

Hotels, offices and towers renovated and fitted out while in use — phased, screened and scheduled around the occupier’s operations.

Beyond Kigali

Delivered in Rwamagana and Ndego, Kayonza as well as across the three districts of Kigali — we mobilise to rural sites and supply them.

Named accountability

A project manager per site, a procurement officer holding material supply, and a General Manager who stays reachable.

References on request

Chief executives, directors and a senior engineer who have worked with us are willing to speak to our work. Their details are available on request.

“Embrace stress-free construction with Sezibera. Your vision, our commitment — your project is securely in our hands.”

Projects we have completed.

Sixteen completed contracts, grouped by the kind of work. Every project listed is complete and handed over.
